PROJECTS

2014

UIET MDU Website (Oct 2014)
This website was designed to facilitate the updated information , syllabus and other notifications to our college students. With this website it became easy to circulate the official information. This was my first project my responsibility was to create **graphics** for the website and create some webpages.

UIET MDU Windows phone App (Nov 2014)
We also created a windows phone app for our college although there were very few window phone users (14 in total to be precise). At this point I started designing **User Interface.**

Confessio App (Nov 2014)
Idea was to design an app that will be used to send one time anonymous message to your contacts and then the person receiving the message is allowed to reply to that message only once and then that session will disappear. I was responsible for **designing UI** for the app and required **graphics**(Logo, backgrounds, etc)

Quizon (jan 2015)
A Quiz app that will allow you to compare your scores with your friend's and would also let you play fastest finger first with your group. I worked on making **wireframes**, UI Design, writing **XAML** code for windows phone app too.

2015

Geek Hub Website (Sept 2015)

Landing page for introducing Geek Hub and its decorum to the students. My responsibility was to work on **Graphics , User Interface** and **Front End.**

Escuela (Online smart school assistance) (Oct 2015)

An online assistant to help schools manage their operations and management more effectively and smartly. Also parents can login to see performance and record of their child. My role included **product development** , **User Interface development** and **graphic design.**

Punjabi University App (Nov 2015)

An **android app** to help students of punjabi university to stay updated with regular notifications from university. Also they can see result directly through the app. My role was to create **UI Design** and **Graphics** for this App.

CDLU App (Nov 2015)

An **android app** to help students of Chaudhary Devi Lal university to stay updated with regular notifications from university. Also they can see result directly through the app. My role was to create **UI Design** and **Graphics** for this App.

2016

Haryana Board App (Jan 2016)

Mobile app to display result and other important information. My role was to create **User Interface** and **Graphics** for this App.

Haryana Board Website Proposal (Feb 2016)

After success with Haryana Board android app. We in collaboration with MTPL proposed haryana board for complete online solution which included there official website, and other softwares. My role was to create **User Interface** , **Graphics** and **Front-End** for the official website.

Desi Hut Website (Feb 2016)

We created a semi Ecommerce website for Desi Hut restaurant. Where customer can view and order the food online using the website. My role included **User-Interface Design**, **User-Research**, **User-Personas**, **Graphics** and **Front-End**.

Package Design Vishuddha (Apr 2016)

My Internship at Aim Infotec Included Designing a package for Chilli Powder, It was a **minimalistic design** with a transparent window.

Sports Romeo Website (Oct 2016)

While working on an Internship with AimInfotec on a social media platform for Sports persons that helps a sports person to book any arena or court to play , or meet another sports person or a team. My responsibility was to design **User-Interface** and **Front-End**.

Indira Gandhi Website (June 2016)

This website was designed to facilitate the updated information , syllabus and other notifications to our college students. With this website it become easy to circulate the official information.my responsibility was to Design **User-Interface** , **Front-End Development**, and **Coordinating with client** throughout the development.

2017

Doc Helpline App (Feb 2017)

An Internship with FreeDoctorHelpline,Platform that connects work on B2B and B2C model which connects doctors, patients, medical stores and hospitals altogether. I was responsible for creating **User-Interface** , **User-Experience Design** , **Icon Design**, For the android and iOS app platform.

Faculty House System (Sept 2017)

Website to provide online status of rooms available for booking on a particular day at faculty house of the University. My role was to Design **User-Interface**, work on **User-Experience** and **Front-End Development.**

Pydroid Website (Dec 2017)

Pydroid is an education Institute with a different methodology for teaching programming language and designing to aspiring college students. This website provide insights about Pydroid and it's offered courses. My responsibility was to create **User-Interface** , **User-Experience** , **Layouts**, **Wireframes**, and **Front-End Development**.

Pydroid Dashboard (Dec 2017)

Web Portal for students and mentor at pydroid. Students can view lectures summary , notes , and relevant resources to that particular lecture. Students can submit their projects and assignments through platform. My role is to create **user-Interface** , work on **User-Experience** using **user-Personas** and feedbacks through **A/B testing**, **Front-end Development**.

RESPONSIBILITY

Geekhub - *Co-Founder, Mentor*

Founder **GeekHub**, a **technical society** in our college to facilitate the knowledge transfer between Juniors and seniors regarding the current technological trends in the society.
It involved regular sessions in which different technologies were taught to the juniors by the seniors. Alongwith being involved in management I was the **Mentor** for the design related courses which involved **Graphic Design**, **Design Principles**, **UI /UX** design.

Google Code-In JBoss - *Mentor*

Google Code-In is a contest to introduce pre-university students (ages 13-17) to open source software development. I am involved with JBoss RedHat to mentor students at Code-In about Design and User-Interface for 2017-2018 session.
